

Multipower M4[®]

Multi-purpose Cleaner

The most versatile biodegradable cleaner / degreaser
for the food industry

Nonfood Compounds
Program Listed - A1
Registration #163976

Multipower M4® Cleaner / degreaser

Versatile cleaner for the food production industry removes stains and degreases

Unlike any other industry, the food production industry demands extremely stringent hygiene requirements.

Industrial cleaning products commonly used still contain harmful chemicals, such as aggressive and hazardous substances, to remove contaminants. These chemicals do their job, but humans and the environment pay the price.

Think of the huge benefits for your staff when working with a non-toxic, non-hazardous cleaning product, hassle-free transport and storage opportunities, and the fact that residue rinse water can be treated as regular wastewater.

To take the next step in making your food production process more sustainable, Ecotec Products offers Multipower M4®, an ecological cleaning product.

Multipower M4® is ideal for removing proteins, mineral oils, grease, and glutes in the food processing industry. It also removes soot and atmospheric pollution effortlessly. Multipower M4® has been accepted by the Council of Fatwa and The Chief Rabbinate Council, enabling companies operating according to the Kosher and Halal guidelines to use it as well. Multipower M4® is produced in the EU, NSF approved, according to the OECD guideline 301B biodegradability directive.

Multipower M4® Cleaner / degreaser

Applicable to ceramics, steel alloys, plastics, and other surfaces

Environmentally-friendly
cleaning product that
meets stringent hygiene
requirements in the food
production industry.

Cleaning and degreasing ceramics, steel alloys, plastics, and other surfaces, rendering a clean and streak-less production environment.

Multipower M4® is a cleaning product and degreaser for food production environments.

Multipower M4® contains no hazardous chemicals. It will not harm any surfaces or equipment. The residue cleaning mixture is fully biodegradable and can be treated as regular wastewater.

Multipower M4® can be used on stained ceramics, steel alloys, plastics, and other surfaces. After rinsing and drying, the surface will be clean and streak-less.

Apply Multipower M4® as a ready-to-use product in a diluted form, a spray, or foam. Certain cleaning problems demand a specific solution. We gladly advise you on your best application method.

Multipower M4® is available in IBCs, cans, and drums.

- Versatile in use; diluted, spray, and foam
- Fully biodegradable
- Safe for humans and the environment
- Food-grade approved by NSF

Multipower M4® Multi-purpose Cleaner

How to use it

Multipower M4® is very versatile in its use. The most optimal application for your production facility depends on your requirements. For instance, production processes that cope with deposits of certain emitted substances or an extreme extent of fouling or grease can use Multipower M4® either diluted, as a spray, or as a foam.

Enabling you to exchange your cleaning chemicals to the sustainable Multipower M4®, we offer you our services of looking into your process. We can arrange samples and help with testing (including lab testing) and implementing Multipower M4® on the work floor.

Please contact us by phone or e-mail if you have any questions or if you require technical support.
